

## Online Instructional Workshop Series

***Begins Wednesday, December 16, 2015 @ 1:00 PM (Eastern)***

***A Monthly Series from the i-Tree Team***

Please join us for a comprehensive ***web-based instructional series*** that will introduce the latest tools in the i-Tree software suite, as well as bring you up to date on the improvements that have been made to the i-Tree collection of inventory, analysis and reporting tools for urban and community forests.

i-Tree is a state-of-the-art, peer-reviewed software suite from the USDA Forest Service that provides urban forestry analysis and benefits assessment tools. The i-Tree Tools help communities of all sizes to strengthen their urban forest management and advocacy efforts by quantifying the structure of community trees and the environmental services that trees provide.

The online training series will take place monthly, with live, interactive sessions led by members of the i-Tree development team and other instructors. This web-based series will introduce i-Tree to you, help you understand its value as an important tool in your urban forest management toolkit and provide you with hands-on demonstrations related to the installation, use and reporting components of the software suite.

***For more information and to register for these free sessions, please visit [www.unri.org/itreeworkshops](http://www.unri.org/itreeworkshops)***
